UN AÑO MÁS EN EL PROGRESO DEL PUERTO DE LA LUZ

Ha transcurrido un año más de la vida del Puerto de la Luz. El hecho, aún cuando encierra la significación especial de habers superado ampliamente todas las cifras relativas al movimiento de buques y de mercancías debe resumirse así, como "un año más", porque todo hace suponer que, transcurrido el tiempo, éste de 1954 aparecerá como otro nuevo eslabón en la historia de nuestro puerto.

En este año de 1954 no se han producido acontecimientos que, de una manera forzada, hayan atraído el tráfico al Puerto de la Luz.

Este hecho es innegable, y por tanto, las cifras que figuran en la presente estadística obedecen a causas normales, por lo que es de presumir que mientras dure esta normalidad persistirá el progreso del puerto hasta llegar al cenit que nada hace suponer próximo.

Durante este año, más de 1.600 barcos de nombres y banderas distintos han operado en sus operaciones en el puerto. Estos buques en sus sucesivas entradas totalizaron 7.214 escalas, cifra que, con ser de un volumen extraordinario, es mucho menos expresiva que la anterior, ya que, la generalidad de los puertos cuenta siempre con un tráfico fijo de líneas regulares que dando un total crecido de buques, sus nombres se repiten con mucha frecuencia. El puerto de La Luz, en cambio, ha conocido este año más de 1.600 buques distintos de todas las características y nacionalidades, lo que demuestra el indudable interés internacional que ofrece a la navegación.

El movimiento de mercancías descargadas y cargadas por los muelles, superando igualmente todas las cifras anteriores, ha alcanzado un volumen de 2.132.565 toneladas métricas, muy estimable si se considera el limitadísimo "hinterland" de este puerto que y que no se computan en dichas cifras 1.369.018 toneladas de aceites pesados que se han suministrado a la navegación, lo que nos daría un total de movimiento de 3.501.583 toneladas.

De todas formas el movimiento de mercancías, comparado con los 22.090.224 toneladas de registro bruto de los buques entrados este año, pone de manifiesto, de una manera palpable, que la característica fundamental del PUERTO DE LA LUZ es la de una ESTACION DE SERVICIOS.

Se hace más notable aún esta manifiesta desproporción entre el tráfico de buques y el movimiento de mercancías al aparecer la partida de petróleos como el contingente de mercancías de mayor volumen.

La privilegiada situación geográfica de esta Isla y las condiciones naturales de nuestro puerto no son causas suficientes para haber logrado atraer a la inmensa mayoría del tráfico constituido por las líneas del Atlántico Sur. Sin más que esa situación y esas condiciones naturales, muy probablemente, sólo hubiera tenido el carácter de refugio y de interés insular. Son, por tanto, otras causas las que han motivado su actual preponderancia y que nos hace augurar un porvenir de ilimitadas posibilidades. El éxito de un puerto de las características del de La Luz reside en saber adaptar sus servicios a las necesidades de la navegación, a medida que éstas van presentándose, logrando establecer de esta forma un perfecto paralelismo entre lo que el tráfico moderno precisa y lo que se pone a su disposición. El cuidado con que se ha venido conservando este paralelismo es la verdadera causa de la espléndida realidad que hoy ofrece el Puerto de La Luz.

La inquietud constante por la mejora de sus instalaciones y el cuidado con que en todo momento se han venido pulsando las necesidades de la navegación, han sido sentidas por dos elementos fundamentales que se han conjugado para el mejor logro de estos fines. Estos dos factores han sido: de un lado, la iniciativa privada y del otro, la protección constante y la ayuda eficaz de la Administración Central del Estado.

Desde los orígenes del puerto, las empresas privadas establecieron aquí sus servicios de suministros de carbones y de agua, en forma tal que los armadores sabían de antemano que podían contar con un avituallamiento de buena calidad y en las mejores condiciones económicas.

Coincidiendo con la innovación de la propulsión por combustibles líquidos, se instalaron servicios para el aprovisionamiento de las motonaves y turbonaves modernas, sin descuidar por ello en ningún momento, el aprovisionamiento de carbón para los buques que utilizan este combustible.

A medida que ha venido imponiéndose la navegación moderna, se han establecido aquí factorías de petróleos de todas clases que permiten el suministro de aceites pesados a un ritmo que nada tiene que envidiar al de los puertos mejor dotados.

Aunque se destaca por sí sola la importancia de la iniciativa privada en un elemento tan vital como el petróleo, no hemos de olvidar que esta iniciativa ha tenido otras muchas manifestaciones que han ayudado igualmente a dar la importancia que actualmente tiene nuestro puerto.

Pero de nada hubieran servido estos factores de no haber contado siempre con

la protección de la Administración Central que, de forma permanente, ha venido dirigiendo y encauzando todas las iniciativas privadas ya apuntadas. Basta poner como ejemplo que cada una de esas factorías petrolíferas, a las que tanto debe el puerto, ha sido posible gracias a la concesión administrativa otorgada en cada caso por el Ministerio de Obras Públicas.

En lo administrativo, cabe decir que no ha habido propuesta formulada por esta Junta de Obras que no obtuviera la aprobación de la Administración Central. Cuantos proyectos han sido redactados por la Dirección Facultativa de las Obras de estos puertos han merecido la conformidad de la Superioridad. Así ha sido posible llevar adelante todas las obras ya ejecutadas como el ensanche del Muelle de La Luz,—obra que por su trascendencia marca una verdadera etapa, la construcción de los tinglados, el proyecto de urbanización y pavimentación—cuyas obras, muy adelantadas, dejan ver perfectamente en lo que va a quedar convertido urbanísticamente el puerto,—, la adquisición del utillaje necesario, la instalación de agua y de alumbrado en los muelles y tantas otras mejoras en los servicios e instalaciones que forzosamente habrán de repercutir en su constante progreso.

En lo económico, es lógico estimar que todas estas mejoras han originado grandes gastos que la Superioridad no ha dudado un solo momento en sufragar. Así, en el año 1946 nos fué concedido un empréstito de cien millones de pesetas que más tarde, en 1952, fué ampliado a doscientos millones.

Incluso ha habido ocasión en que el Ministro de Obras Públicas ha ido más lejos aún que la propia Junta en su afán de mejorar las instalaciones portuarias y ponerlas a la altura que el interés internacional del puerto requiere. Reciente tenemos el caso de la disposición de nuestra Dirección General ordenando que se redacte un plan de obras e instalaciones a realizar en los próximos cinco años, el cual asciende a unos 350 millones de pesetas. La Dirección Facultativa, con la diligencia que el caso requiere, ha redactado dicho Plan de obras que comprende la construcción de un dique seco para buques de gran tonelaje, el muelle pesquero y varaderos y otros servicios para esta clase de buques, la avenida de enlace del muelle de Las Palmas con el Puerto y otras muchas obras de trascendental importancia para nuestra vida marítima.

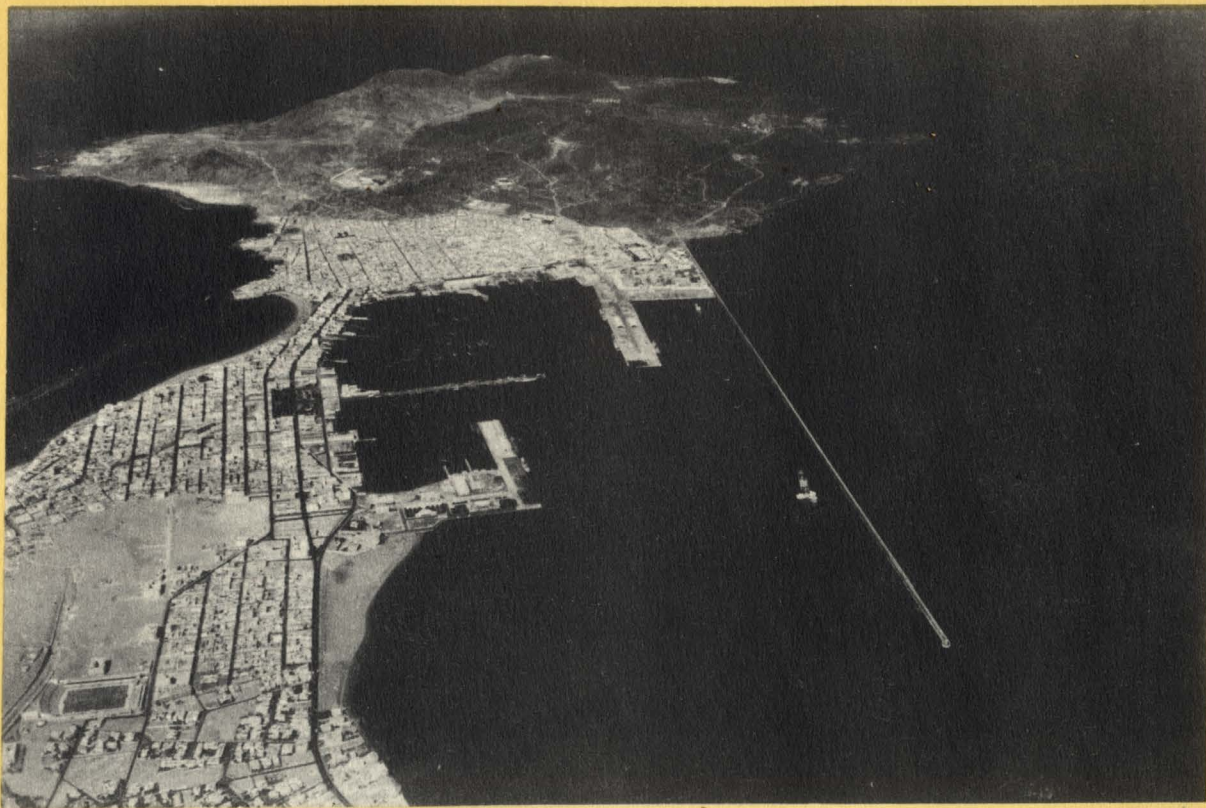

Por todo esto, cuando podemos ofrecer unos resultados como los que se ponen de manifiesto en esta publicación, hemos de expresar nuestro reconocimiento más sincero a la Administración Central del Estado que, con su ayuda constante, ha hecho posible que hayamos llegado a conseguir un tráfico que no tiene parangón en la historia de los puertos españoles y que está a la altura de los grandes puertos internacionales.

El carácter de meramente transitorio y de estación de avituallamiento marca una etapa que se puede considerar totalmente lograda.

La construcción del Dique Seco, con todas las industrias que a su amparo han de establecerse, marcará una nueva etapa del puerto como una completa ESTACION DE SERVICIOS. Este privilegiado enclave geográfico, que ha ayudado a alcanzar un tránsito incasante de buques de Europa a Sud-América y Sud-América, ha de rendir otros frutos de mayor envergadura. La más importante función de este puerto no se ha logrado aún. El enorme porvenir que, en lo económico, está reservado al Continente africano está íntimamente ligado al de nuestro puerto. Todos los modernos economistas reconocen que el gran continente negro habrá de convertirse, en un futuro próximo, en la fuente natural de recursos para Europa. Esta tesis empieza ya a tener manifestaciones de gran interés, que se hacen palpables en un puerto como el de Dakar que ha unido a su volumen de suministros un movimiento de mercancías de verdadera consideración.

Por su situación clave en la ruta entre Africa y Europa, para el Puerto de La Luz ha de llegar el momento de ver sus muelles, tinglados y almacenes abarrotados de mercancías africanas en régimen de transbordo para los puertos europeos. Y este será el momento en que se habrá cumplido la total misión del puerto, con la culminación de la tercera etapa de su normal desenvolvimiento: Las Palmas, ESTACION DE TRANSBORDOS.

Pero el presente, es decir, la consideración del Puerto de La Luz, como meramente transitorio y como estación de suministros, es por sí solo enteramente satisfactorio y si se pretende hacer una exposición de las nuevas etapas que lógicamente se esperan, es únicamente para poner de manifiesto que, cuantas mejoras y cuantas inversiones se hagan en este puerto, estarán siempre plenamente justificadas. Criterio este que comparte la Administración Central del Estado, demostrándolo así con la constante inquietud inspiradora de sus acertadas directrices.
